Management Science and Technology graduate with high honors. Currently pursuing an MSc in Operations & Supply Chain Management at Trinity College Dublin. Gained experience in **Project Management** and **Logistics** during my internship at L'Oréal and worked as a Tax Technology Consultant at Deloitte in Brussels where I gained hands on experience on **SAP**. Completed military service in Greece, strengthening organizational **discipline** and **coordination skills**, and most recently worked at Wemer Hellas, acquiring hands-on experience in **Supply Chain Operations** and **client relations**. Adaptable, team-oriented, and motivated to further specialize in project management, operations and supply chain management.

CAREER – EXPERIENCE

Operations Associate

Mar 2025 – Jun 2025

Wemer Hellas | Full time

- Processed and audited a high volume of client orders end-to-end maintaining accuracy and turnaround against service commitments across a multi-client portfolio.
- Investigated delivery discrepancies, identified root causes, and coordinated corrective action with suppliers and carriers to minimize client impact.
- Conducted physical inventory counts at warehouse level to ensure stock accuracy and alignment with system records
- Maintained daily communication with our clients and sales team to ensure alignment, order fulfilment and supply continuity

Tax Technology Consultant

Sep 2023 – Sep 2024

Deloitte Brussels | Full time

- Supported end-to-end SAP implementation projects for multiple clients, managing large datasets through extraction, reconciliation, and formatting to validate automated tax document outputs
- Coordinated project documentation, stakeholder communications, and cross-functional collaboration across internal Deloitte teams and external clients, while assisting with client onboarding, go-live activities, and new team member training

Project Management in Logistics

Mar 2023 – Jun 2023

L'Oréal Greece | Internship

- Designed and implemented an Excel-based semi-automated sample distribution system by conducting cross-departmental process mapping, identifying operational inefficiencies, and optimizing allocation based on physician segmentation and commercial priority
- Presented solution to senior management through iterative feedback cycles and delivered staff training to ensure successful adoption
